

The SESK Party Game

STUFF EVERY DAD SHOULD KNOW

How to play (30 seconds)

1. The reader reads a card and its three answers out loud.
2. Everyone says "One, two, three, Goldilocks!" and holds up 1, 2, or 3 fingers.
3. The reader flips the card and reads the answer and the Why.
4. Everyone who was right takes a point.
5. The reader reads the joke with a straight face. Anyone laughs or groans? The reader takes a point. Nobody got it right? The reader takes a point.
6. Pass the deck left. Most points when the points run out wins.

What you need

These cards and the point tokens on the last two pages. No tokens? Use coins, buttons, pebbles, or marshmallows. 3 to 10 players, ages 8 and up.

Expert rule: Bet It

Before the reader flips the card, you may put one of your points on your answer. Right: take your normal point plus one extra. Wrong: your bet goes back to the pile. That's it.

Printing

Print single-sided, on cardstock if you have it. Cut on the dashed lines. Each card is a 3.5 x 5 inch index card. The answer half is upside down on purpose, so the table can't peek. Cards 1 to 50 of 104. More cards and the free daily online game at sesk.info. Built 2026-10-12.

CARS & DRIVING

How long does NHTSA say a child should ride rear-facing?

- A** As long as possible
- B** Only until their first birthday
- C** Until they can walk on their own

FLIP FOR THE ANSWER

#4229

SESK.INFO

STRAIGHT FACE
How do you get an astronaut's baby to stop crying?
You rocket.

A As long as possible
WHY NHTSA says to keep your child rear-facing as long as possible. It is the best way to keep a child safe in a car.

CARS & DRIVING

Until what age does NHTSA say to keep a child in the back seat?

- A** Through age 8
- B** Through age 10
- C** At least through age 12

FLIP FOR THE ANSWER

#4230

SESK.INFO

STRAIGHT FACE
How do you get two whales in a car? Start in England and drive West.

C At least through age 12
WHY NHTSA says to keep your child in the back seat at least through age 12. The back seat is safer for kids.

CARS & DRIVING

What does a booster seat do for a child?

- A** Gives the child their own five-point harness
- B** Positions the child so the adult belt fits properly
- C** Lets the child ride without a seat belt on short trips

FLIP FOR THE ANSWER

#4231

SESK.INFO

STRAIGHT FACE
My sister bet me \$15 that I couldn't build a car out of spaghetti. You should have seen the look on her face as I drove pasta.

B Positions the child so the adult belt fits properly
WHY A booster raises and positions a child so the vehicle's lap-and-shoulder belt fits properly. Seat belts are built for adult bodies.

CARS & DRIVING

On a properly fitted seat belt, where should the lap belt lie?

- A** Across the stomach
- B** Across the hip bones and belly
- C** Snugly across the upper thighs

FLIP FOR THE ANSWER

#4232

SESK.INFO

STRAIGHT FACE
I couldn't figure out how the seat belt worked. Then it just clicked.

C Snugly across the upper thighs
WHY NHTSA says the lap belt must lie snugly across the upper thighs, not the stomach. A belt across the soft belly can hurt a child in a sudden stop.

CARS & DRIVING

Where should the shoulder belt lie on a child who fits a seat belt?

- A** Across the shoulder and chest, not the neck or face
- B** Across the neck, tucked under the chin
- C** Behind the child's back

FLIP FOR THE ANSWER

#4233

SESK.INFO

STRAIGHT FACE
The shoulder belt is the only thing in the car that gets a hug every day.

A Across the shoulder and chest, not the neck or face
WHY NHTSA says the shoulder belt should lie snugly across the shoulder and chest and not cross the neck or face. If it does, the child still needs a booster.

CARS & DRIVING

A car seat weighs 15 pounds. By NHTSA's formula, what is the heaviest child for lower-anchor installation?

- A** 65 pounds
- B** 80 pounds
- C** 50 pounds

FLIP FOR THE ANSWER

#4234

SESK.INFO

STRAIGHT FACE
Did you know you can get a wooden car seat? It comes with a sign that says, "Baby on Board."

C 50 pounds
WHY NHTSA's lower anchor weight limit is 65 pounds minus the weight of the car seat. A 15 pound seat leaves 50 pounds for the child.

CARS & DRIVING

Where does NHTSA say to find your car's recommended tire pressure?

- A** On the door edge label or in the owner's manual
- B** Molded into the tire sidewall
- C** On a sticker under the hood

FLIP FOR THE ANSWER

#4235

SESK.INFO

STRAIGHT FACE
They tried to make a diamond shaped like a duck. It quacked under the pressure.

A On the door edge label or in the owner's manual
WHY Look at the Tire and Loading Information Label on the driver's side door edge, or check the owner's manual. The number on the tire sidewall is a maximum, not the recommended pressure.

CARS & DRIVING

For an accurate reading, when should you check tire pressure?

- A** Right after a long highway drive
- B** After sitting unused for three hours or more
- C** Within a minute of parking

FLIP FOR THE ANSWER

#4236

SESK.INFO

STRAIGHT FACE
"Dad, I'm cold." "Go stand in the corner, I hear it's 90 degrees."

B After sitting unused for three hours or more
WHY NHTSA says to check pressure when the tires are cold, meaning the car has not been driven for at least three hours. Driving heats the tires and raises the reading.

CARS & DRIVING

In the penny test, what means it is time to replace your tires?

- A** You can see the top of Lincoln's head
- B** Lincoln's head is half covered
- C** You can see Lincoln's whole face

FLIP FOR THE ANSWER

#4237

SESK.INFO

STRAIGHT FACE
My tires are so worn that a penny test was a waste of a perfectly good penny.

A You can see the top of Lincoln's head
WHY Put a penny in a tread groove with Lincoln's head pointing down. If you can see the top of Lincoln's head, the tread is worn to about 2/32 of an inch and it is time to replace.

CARS & DRIVING

At what tread depth does NHTSA say tires are unsafe and should be replaced?

- A** 1/8 of an inch
- B** 2/32 of an inch
- C** 1/2 of an inch

FLIP FOR THE ANSWER

#4238

SESK.INFO

STRAIGHT FACE
I'm tired of following my dreams. I'm just going to ask them where they are going and meet up with them later.

B 2/32 of an inch
WHY NHTSA says tires are not safe and should be replaced when tread is worn down to 2/32 of an inch. Use a tread gauge or the penny test to check. Worn tires grip wet roads poorly.

CARS & DRIVING

How often does NHTSA say to rotate tires, if your vehicle maker recommends it?

- A** Every 1,000 to 2,000 miles
- B** Every 20,000 to 25,000 miles
- C** Every 5,000 to 8,000 miles

FLIP FOR THE ANSWER

#4239

SESK.INFO

STRAIGHT FACE
The invention of the wheel was what got things rolling

C Every 5,000 to 8,000 miles
WHY If the manufacturer recommends it, rotate tires every 5,000 to 8,000 miles, or sooner if uneven wear appears. Rotating helps tires wear evenly.

CARS & DRIVING

Can the tire pressure warning light replace checking your tires with a gauge?

- A** Yes, it warns at the first small drop
- B** No, it only warns when a tire is significantly low
- C** Yes, it shows exact pressure in every tire

FLIP FOR THE ANSWER

#4240

SESK.INFO

STRAIGHT FACE
Some people eat light bulbs. They say it's a nice light snack.

B No, it only warns when a tire is significantly low
WHY NHTSA says TPMS only activates a warning when a tire is significantly underinflated. It is not a substitute for regular tire maintenance, so keep using a gauge.

CARS & DRIVING

On a tire's TIN, what do the last four digits tell you?

- A** The tire's maximum speed and load
- B** The tread depth when new
- C** The week and year the tire was made

FLIP FOR THE ANSWER

#4241

SESK.INFO

STRAIGHT FACE
Astronomers got tired watching the moon go around the earth for 24 hours. They decided to call it a day.

C **WHY** NHTSA says the last four digits of the Tire Identification Number show the week and year the tire was made. A code like 2325 means week 23 of 2025.

The week and year the tire was made

CARS & DRIVING

Where can you usually see the 17-character VIN without opening anything?

- A** Lower left of the windshield
- B** Inside the glove box lid
- C** On the rear bumper

FLIP FOR THE ANSWER

#4242

SESK.INFO

STRAIGHT FACE
A magician was driving down the street and then he turned into a driveway.

A **WHY** NHTSA says to look on the lower left of your car's windshield for the 17-character VIN. You need it to check for recalls.

Lower left of the windshield

CARS & DRIVING

What does NHTSA say a dealership charges to fix a recalled part?

- A** Parts only, labor is free
- B** Half price during the first year
- C** Nothing, it is free

FLIP FOR THE ANSWER

#4243

SESK.INFO

STRAIGHT FACE
What happens to a frog's car when it breaks down? It gets toad.

C **WHY** NHTSA says to contact your local dealership to fix the recalled part for free. Look up your VIN on NHTSA's site to see if any recalls are open.

Nothing, it is free

CARS & DRIVING

Why does Ready.gov say to keep your gas tank full?

- A** In case of evacuation or power outages
- B** It stops the fuel gauge from wearing out
- C** It makes the engine run quieter

FLIP FOR THE ANSWER

#4244

SESK.INFO

STRAIGHT FACE
What has three letters and starts with gas? A Car.

A **WHY** Ready.gov says to keep your gas tank full in case of evacuation or power outages. A full tank also helps keep the fuel line from freezing.

In case of evacuation or power outages

CARS & DRIVING

Ready.gov lists cat litter or sand in a car emergency kit. What is it for?

- A** Absorbing oil leaks
- B** Better tire traction
- C** Cleaning the windshield

FLIP FOR THE ANSWER

#4245

SESK.INFO

STRAIGHT FACE
What did the traffic light say to the car as it passed?
Don't look I'm changing!

B Better tire traction
WHY Ready.gov lists cat litter or sand for better tire traction. Sprinkle it under a stuck tire on ice or snow.

SAFETY & FIRST AID

How much water per person per day does Ready.gov suggest for an emergency kit?

- A** One gallon
- B** One cup
- C** Two gallons

FLIP FOR THE ANSWER

#4246

SESK.INFO

STRAIGHT FACE
Someone asked me to name two structures that hold water. I said "Well dam"

A One gallon
WHY Ready.gov says one gallon per person per day for several days, for drinking and sanitation. A family of four needs about 12 gallons for three days.

CARS & DRIVING

When jump-starting, where does the last cable clamp go?

- A** The dead battery's negative post
- B** A solid metal point away from the battery
- C** The jump pack's casing

FLIP FOR THE ANSWER

#4247

SESK.INFO

STRAIGHT FACE
Breaking news! Energizer Bunny arrested, charged with battery.

B A solid metal point away from the battery
WHY Kia's manual says to make the final connection to a solid, stationary, metallic point away from the battery. This keeps any spark away from battery gases.

CARS & DRIVING

Which of these should you NOT do while connecting jumper cables?

- A** Keep flames and sparks away
- B** Use only a 12-volt system
- C** Lean over the battery

FLIP FOR THE ANSWER

#4248

SESK.INFO

STRAIGHT FACE
How do you pick out a dead battery from a pile of good ones? It's got no spark!

C Lean over the battery
WHY Kia's manual says not to lean over the battery when making connections. Keep flames and sparks away from the battery too.

CARS & DRIVING

When should you NOT attempt to jump-start a car?

- A** When it is cloudy
- B** When the dead battery is frozen
- C** When the dead car's radio is on

FLIP FOR THE ANSWER

#4249

SESK.INFO

STRAIGHT FACE
What's the best way to charge a car battery? With a credit card!

B **WHY** When the dead battery is frozen
Kia's manual says not to jump-start if the discharged battery is frozen or its electrolyte level is low. Call for roadside help instead.

CARS & DRIVING

While changing a tire, what should you never do with a car held up only by a jack?

- A** Park it on level ground
- B** Apply the parking brake
- C** Put any part of your body under it

FLIP FOR THE ANSWER

#4250

SESK.INFO

STRAIGHT FACE
Why did the car take a nap? It was tired.

C **WHY** Put any part of your body under it
Kia's manual says never put any part of your body under a vehicle that is only supported by a jack. Jacks can slip or fail.

CARS & DRIVING

Before changing a tire, how should you park?

- A** Level, firm ground with the parking brake on
- B** On a gentle slope with the engine running
- C** On soft shoulder grass with the gear in drive

FLIP FOR THE ANSWER

#4251

SESK.INFO

STRAIGHT FACE
Did you hear about the mechanic that got addicted to drinking brake fluid? They said they could stop any time they want to.

A **WHY** Level, firm ground with the parking brake
Kia's manual says to park on a level, firm surface, apply the parking brake and turn the vehicle off. A car on a slope or soft ground can roll or slip.

CARS & DRIVING

When changing a flat, when do you first loosen the lug nuts?

- A** Only after the tire is off the ground
- B** Never, remove them with the car up
- C** About one turn, before raising the car

FLIP FOR THE ANSWER

#4252

SESK.INFO

STRAIGHT FACE
I adopted my dog from a blacksmith. As soon as we got home he made a bolt for the door.

C **WHY** About one turn, before raising the car
Kia's manual says to loosen the lug nuts one turn each while the tire is on the ground, then not remove any until the tire is raised. The ground keeps the wheel from spinning.

CARS & DRIVING

Which wheel does Kia say to block before jacking up a car?

- A** The wheel diagonally opposite the jack
- B** The wheel right next to the jack
- C** Both wheels on the jacked side

FLIP FOR THE ANSWER

#4253

SESK.INFO

STRAIGHT FACE
I block the wheel opposite the jack. My kids block the TV opposite the chores.

A The wheel diagonally opposite the jack
WHY Kia's manual says to block both sides of the wheel diagonally opposite the jack position. Blocking keeps the car from rolling.

CARS & DRIVING

After you change a wheel yourself, what does Kia say to do?

- A** Nothing, hand-tight is permanent
- B** Have a dealer tighten the nuts to proper torque
- C** Retighten every nut 10 more turns

FLIP FOR THE ANSWER

#4254

SESK.INFO

STRAIGHT FACE
Did I ever tell you about the hardworking mechanic who had to push her car five miles on its hubcaps? She was tireless.

B Have a dealer tighten the nuts to proper torque
WHY Kia's manual says to have the vehicle checked by an authorized dealer to tighten the wheel nuts to their proper torque. A roadside wrench cannot measure torque.

CARS & DRIVING

Why wait a few minutes after turning the engine off before checking the oil?

- A** So the oil drains back to the oil pan
- B** So the oil cools to room temperature
- C** So the dipstick can expand

FLIP FOR THE ANSWER

#4255

SESK.INFO

STRAIGHT FACE
As I suspected, someone has been adding soil to my garden. The plot thickens.

A So the oil drains back to the oil pan
WHY A Kia manual says to turn the engine off and wait a few minutes for the oil to return to the oil pan. Checking too soon gives a falsely low reading.

CARS & DRIVING

If the dipstick shows the oil near the Low mark, what should you do?

- A** Add oil until it covers the whole dipstick
- B** Add oil up to Full, but do not overfill
- C** Do nothing until the oil light comes on

FLIP FOR THE ANSWER

#4256

SESK.INFO

STRAIGHT FACE
I need to fill my oil but can only find the 710 cap. You know, 710 = OIL upside down.

B Add oil up to Full, but do not overfill
WHY A Kia manual says if oil is near or at L (Low), add enough oil to bring the level to F (Full). Do not overfill.

CARS & DRIVING

Why never open a radiator cap on a hot engine?

- A** The cap breaks if it is cooler
- B** The engine stops running
- C** Hot coolant can spray out and burn you

FLIP FOR THE ANSWER

#4257

SESK.INFO

STRAIGHT FACE
How come the stadium got hot after the game?
Because all of the fans left.

C Hot coolant can spray out and burn you
WHY A Kia manual says never attempt to remove the radiator cap while the engine is operating or hot. Wait until it cools down.

SAFETY & FIRST AID

How often does Ready.gov say to replace smoke alarm batteries?

- A** Once every five years
- B** Twice a year, unless 10-year lithium
- C** Only when they chirp for a week

FLIP FOR THE ANSWER

#4258

SESK.INFO

STRAIGHT FACE
Slept like a log last night ... woke up in the fireplace.

B Twice a year, unless 10-year lithium
WHY Ready.gov says to replace batteries twice a year, unless you use 10-year lithium batteries. Many people do it when clocks change.

SAFETY & FIRST AID

How often should you replace the whole smoke alarm unit?

- A** Every 2 years
- B** Every 25 years
- C** Every 10 years, or per the maker's instructions

FLIP FOR THE ANSWER

#4259

SESK.INFO

STRAIGHT FACE
What kind of bug can tell time? A clock-roach.

C Every 10 years, or per the maker's instructions
WHY Ready.gov says to replace the entire smoke alarm unit every 10 years or according to the manufacturer's instructions. Sensors wear out over time.

SAFETY & FIRST AID

Where does Ready.gov say to install smoke alarms in your home?

- A** On every level, including the basement
- B** Only in the kitchen
- C** Only in the hallway outside bedrooms

FLIP FOR THE ANSWER

#4260

SESK.INFO

STRAIGHT FACE
Want to hear a chimney joke? Got stacks of em! First one's on the house

A On every level, including the basement
WHY Ready.gov says to install smoke alarms on every level of your home, including the basement. More alarms means earlier warning.

SAFETY & FIRST AID

How often does Ready.gov say to practice your home fire escape plan?

- A** Once every five years
- B** Never, planning is enough
- C** Twice each year

FLIP FOR THE ANSWER

#4261

SESK.INFO

Our family fire drill is a race. Mom wins, the dog is second, and Dad is still looking for his shoes.

STRAIGHT FACE

WHY Ready.gov says to practice your home fire escape plan twice each year. Escape plans help you get out of your home quickly.

C Twice each year

SAFETY & FIRST AID

Ready.gov says a fire can become life-threatening in how long?

- A** Just two minutes
- B** About ten minutes
- C** About half an hour

FLIP FOR THE ANSWER

#4262

SESK.INFO

Why did the worker get fired from the orange juice factory? Lack of concentration.

STRAIGHT FACE

WHY Ready.gov says a fire can become life-threatening in just two minutes. That is why working alarms and a practiced exit plan matter.

A Just two minutes

SAFETY & FIRST AID

Ready.gov says to keep a fire extinguisher in which room?

- A** Your attic
- B** Your kitchen
- C** Your bathroom

FLIP FOR THE ANSWER

#4263

SESK.INFO

Coffee has a tough time at my house, every morning it gets mugged.

STRAIGHT FACE

WHY Ready.gov says to keep a fire extinguisher in your kitchen. Cooking is where many home fires start, so keep it where you can reach it.

B Your kitchen

SAFETY & FIRST AID

In the PASS method, what does the P stand for?

- A** Pull the pin
- B** Press the handle
- C** Point at the smoke

FLIP FOR THE ANSWER

#4264

SESK.INFO

I got fired from a florist, apparently I took too many leaves.

STRAIGHT FACE

WHY OSHA's PASS technique starts with Pull: pull the pin, which also breaks the tamper seal. Then Aim, Squeeze and Sweep.

A Pull the pin

SAFETY & FIRST AID

With a fire extinguisher, where do you aim the nozzle?

- A** At the top of the flames
- B** Low, at the base of the fire
- C** At the smoke near the ceiling

FLIP FOR THE ANSWER

#4265

SESK.INFO

STRAIGHT FACE
Why did the fire extinguisher go to therapy? It had too much pressure to handle!

B Low, at the base of the fire
WHY OSHA says to aim low, pointing the nozzle at the base of the fire. Hit the fuel, not the flames at the top.

SAFETY & FIRST AID

If you have any doubt about fighting a fire, OSHA says to do what?

- A** Wait for the flames to grow
- B** Try the extinguisher anyway
- C** Evacuate immediately

FLIP FOR THE ANSWER

#4266

SESK.INFO

STRAIGHT FACE
I used to work at a fire hydrant company. I quit after I couldn't find parking.

C Evacuate immediately
WHY OSHA says if you have the slightest doubt about your ability to fight a fire, evacuate immediately. Evacuate also if the extinguisher is empty and the fire isn't out.

SAFETY & FIRST AID

What makes carbon monoxide especially dangerous?

- A** It always smells like rotten eggs
- B** You cannot see or smell it
- C** It only forms outdoors

FLIP FOR THE ANSWER

#4267

SESK.INFO

STRAIGHT FACE
How much money does a skunk have? Just one scent.

B You cannot see or smell it
WHY CDC says carbon monoxide is an odorless, colorless gas that kills without warning. A CO alarm is how you know it is there.

SAFETY & FIRST AID

CO poisoning symptoms are often mistaken for what illness?

- A** A sunburn
- B** Food allergies
- C** The flu

FLIP FOR THE ANSWER

#4268

SESK.INFO

STRAIGHT FACE
When the whole family sneezes together, check the alarm before the pharmacy.

C The flu
WHY CDC says CO symptoms are often described as flu-like. If a whole household feels sick together, or symptoms ease when you leave, suspect CO.

SAFETY & FIRST AID

Where does the CDC say to install CO detectors?

- A** Near every sleeping area
- B** Only in the garage
- C** Only in the kitchen

FLIP FOR THE ANSWER

#4269

SESK.INFO

STRAIGHT FACE
What did the blanket say to the bed? I've got you covered.

A **Near every sleeping area**
WHY CDC says to install battery-operated or battery back-up CO detectors near every sleeping area in your home. They can wake you while you sleep.

SAFETY & FIRST AID

How far from windows, doors and vents should a generator run outdoors?

- A** About 3 feet
- B** Anywhere outdoors is fine
- C** More than 20 feet

FLIP FOR THE ANSWER

#4270

SESK.INFO

STRAIGHT FACE
What did the light bulb say to the generator? I really get a charge out of you!

C **More than 20 feet**
WHY CDC says to use generators only outside, more than 20 feet away from any windows, doors and vents. Never run one inside a home or garage, even with doors open.

SAFETY & FIRST AID

Is it safe to run a car in an attached garage with the door open?

- A** No, never
- B** Yes, if the door is fully open
- C** Yes, for under ten minutes

FLIP FOR THE ANSWER

#4271

SESK.INFO

STRAIGHT FACE
When is a car not a car? When it turns into a parking lot.

A **No, never**
WHY CDC says never run your car or truck inside a garage attached to a house, even with the garage door open. CO can seep into the home.

SAFETY & FIRST AID

Where does CPSC NOT recommend installing a CO alarm?

- A** Outside sleeping areas
- B** In the kitchen or above fuel-burning appliances
- C** On every level of the home

FLIP FOR THE ANSWER

#4272

SESK.INFO

STRAIGHT FACE
How do you cook an alligator? With a croc-pot.

B **In the kitchen or above fuel-burning appliances**
WHY CPSC says CO alarms should go on every level and outside sleeping areas. It does not recommend kitchens or above fuel-burning appliances, where brief spikes cause false alarms.

HOME & YARD

What does PHMSA say odorized natural gas smells like?

- A** Rotten eggs
- B** Fresh paint
- C** Burnt toast

FLIP FOR THE ANSWER

#4273

SESK.INFO

STRAIGHT FACE
Why shouldn't you argue with a skunk? It'll cause a stink.

A Rotten eggs
WHY PHMSA describes a rotten egg smell of odorized natural gas. Natural gas itself has no smell, so utilities add the odor so leaks are noticed.

HOME & YARD

If you smell gas in your house, what should you NOT do?

- A** Leave the area right away
- B** Flip light switches or other electrical switches
- C** Call 911 from a neighbor's house

FLIP FOR THE ANSWER

#4274

SESK.INFO

STRAIGHT FACE
Why did the lights go out? Because they liked each other!

B Flip light switches or other electrical switches
WHY PHMSA says to leave the area and not to operate light switches, garage door openers or other electrical switches, since a spark can ignite gas. Call 911 from a safe spot well away from the leak.

HOME & YARD

In an emergency, which way do you turn a water meter valve with a wrench to shut it?

- A** Counterclockwise
- B** Either way, it does not matter
- C** Clockwise

FLIP FOR THE ANSWER

#4275

SESK.INFO

STRAIGHT FACE
Know where your shut-off valve is before you need it. Dad's emergency plan is not 'call Dad'.

C Clockwise
WHY The City of Bellevue says to use a crescent wrench or meter valve key and turn the valve clockwise. Clockwise closes most valves, remember 'righty tighty'.

HOME & YARD

How often does CPSC say to test GFCI outlets?

- A** Once a year
- B** Monthly
- C** Only when they trip

FLIP FOR THE ANSWER

#4276

SESK.INFO

STRAIGHT FACE
What would you call a power failure? A current event!

B Monthly
WHY CPSC says to test GFCIs monthly to make sure they are working properly. Press Test, the Reset button should pop and the power should cut off.

HOME & YARD

How often does the US Fire Administration say to clean the dryer lint filter?

- A** Once a month
- B** Once a season
- C** Before and after each cycle

FLIP FOR THE ANSWER

#4277

SESK.INFO

STRAIGHT FACE
What did the sock say to the other before going in the washing machine? You realize one of us isn't coming back.

C Before and after each cycle
WHY USFA says to clean the lint filter before and after each cycle. Lint is flammable, and a clogged filter or vent traps heat.

HOME & YARD

How far should a space heater be from bedding, drapes and furniture?

- A** At least three feet
- B** About one foot
- C** Six inches is enough

FLIP FOR THE ANSWER

#4278

SESK.INFO

STRAIGHT FACE
Why is it always hot in the corner of a room? Because a corner is 90 degrees.

A At least three feet
WHY CPSC says to keep the heater at least three feet from bedding, drapes, furniture or other flammable materials. Ready.gov says the same: three feet from portable heaters.
