

The SESK Party Game

STUFF EVERY DOG OWNER SHOULD KNOW

How to play (30 seconds)

1. The reader reads a card and its three answers out loud.
2. Everyone says "One, two, three, Goldilocks!" and holds up 1, 2, or 3 fingers.
3. The reader flips the card and reads the answer and the Why.
4. Everyone who was right takes a point.
5. The reader reads the joke with a straight face. Anyone laughs or groans? The reader takes a point. Nobody got it right? The reader takes a point.
6. Pass the deck left. Most points when the points run out wins.

What you need

These cards and the point tokens on the last two pages. No tokens? Use coins, buttons, pebbles, or marshmallows. 3 to 10 players, ages 8 and up.

Expert rule: Bet It

Before the reader flips the card, you may put one of your points on your answer. Right: take your normal point plus one extra. Wrong: your bet goes back to the pile. That's it.

Printing

Print single-sided, on cardstock if you have it. Cut on the dashed lines. Each card is a 3.5 x 5 inch index card. The answer half is upside down on purpose, so the table can't peek. Cards 1 to 50 of 153. More cards and the free daily online game at sesk.info. Built 2026-10-12.

DOGS

Which of these is a core vaccine that is recommended for every dog?

- A** Lyme disease
- B** Bordetella
- C** Rabies

FLIP FOR THE ANSWER

#4332

SESK.INFO

STRAIGHT FACE
Why was the puppy crying? She was having a ruff day.

C Rabies
WHY Core vaccines protect against the most serious diseases, so vets recommend them for all dogs. Rabies, distemper, parvovirus and adenovirus are on that list.

DOGS

Which of these is a traditionally non-core dog vaccine, given based on lifestyle risk?

- A** Distemper
- B** Bordetella
- C** Parvovirus

FLIP FOR THE ANSWER

#4333

SESK.INFO

STRAIGHT FACE
Why did the dog do so well in school? He was the teacher's pet.

B Bordetella
WHY Non-core vaccines are given when a dog's lifestyle or home area raises its risk, such as boarding or daycare. Distemper and parvovirus are core for all dogs.

DOGS

At about what age do a puppy's vaccine shots usually begin?

- A** 6 to 8 weeks
- B** 6 months
- C** 1 year

FLIP FOR THE ANSWER

#4334

SESK.INFO

STRAIGHT FACE
What is the difference between a pet tree and a pet dog? The pet tree has a quieter bark.

A 6 to 8 weeks
WHY Puppies start a series of shots at 6 to 8 weeks. Each dose comes every 3 to 4 weeks, because one shot is not enough for young puppies.

DOGS

A puppy's final core booster should be given no sooner than what age?

- A** 10 weeks
- B** 16 weeks
- C** 6 months

FLIP FOR THE ANSWER

#4335

SESK.INFO

STRAIGHT FACE
What did the mama dog say to the puppy who would not stop asking for treats? Quit hounding me.

B 16 weeks
WHY Antibodies from the mother can block early shots, so the last dose in the series is timed after the puppy is about 16 weeks old.

DOGS

Why do puppies need repeated vaccine doses until about 16 weeks old?

- A** The vaccine only lasts about a week
- B** Puppies only respond to vaccines in summer
- C** Antibodies from the mother can block the vaccine

FLIP FOR THE ANSWER

#4336

SESK.INFO

STRAIGHT FACE
Why does my newborn puppy never want to leave my side? He's in puppy love!

C Antibodies from the mother can block the vaccine
WHY Puppies get antibodies from their mother, and those can interfere with a vaccine. Nobody knows exactly when they fade for each puppy, so doses repeat until after 16 weeks.

DOGS

After the puppy series, how often are core vaccines like parvovirus usually boosted?

- A** Every 3 years
- B** Every month
- C** Every 6 weeks

FLIP FOR THE ANSWER

#4337

SESK.INFO

STRAIGHT FACE
What should you do for your pup's first birthday? Throw her a paw-ty!

A Every 3 years
WHY After a booster within the first year, many core vaccines are repeated every 3 years. Annual boosters are not necessary for these core vaccines.

DOGS

At about what age do puppies typically get their first rabies shot, per UC Davis?

- A** 6 weeks
- B** 12 weeks
- C** 1 year

FLIP FOR THE ANSWER

#4338

SESK.INFO

STRAIGHT FACE
What type of music do young dogs like best? Pup music.

B 12 weeks
WHY UC Davis recommends a single dose of killed rabies vaccine around 12 weeks, then a booster one year later. Local rules can differ, so ask your vet.

DOGS

Where should you check to learn which vaccines your dog is legally required to have?

- A** The dog food label
- B** Your local or state health department
- C** The pet store clerk

FLIP FOR THE ANSWER

#4339

SESK.INFO

STRAIGHT FACE
Why are border collies such good listeners? Because you can tell they really herd you.

B Your local or state health department
WHY Rules differ from place to place, and rabies shots are often required by law. Health departments publish the specific regulations for your area.

DOGS

Why is the rabies vaccine so important for dogs?

- A** Once signs appear, rabies is nearly always fatal
- B** Rabies only causes a mild itch
- C** It only affects dogs older than ten

FLIP FOR THE ANSWER

#4340

SESK.INFO

STRAIGHT FACE
Who gives dogs Christmas presents? Santa Paws.

A Once signs appear, rabies is nearly always fatal
WHY Rabies cannot be treated once symptoms start, so prevention is the whole game. Keeping your dog's rabies shot current protects your dog and your family.

DOGS

Which animals are most often found with rabies in the US?

- A** Squirrels, rabbits and mice
- B** Bats, skunks, raccoons and foxes
- C** Pet hamsters and guinea pigs

FLIP FOR THE ANSWER

#4341

SESK.INFO

STRAIGHT FACE
What do you call a large dog that meditates? A Aware wolf.

B Bats, skunks, raccoons and foxes
WHY These wild animals carry most US rabies. Rabies spreads mainly through bites or scratches, so keep your dog away from wildlife and keep its rabies shot current.

DOGS

Why can parvovirus stay in a yard for a long time?

- A** Sunlight kills it but it grows back
- B** Rain washes it away within an hour
- C** It resists heat, cold, humidity and drying

FLIP FOR THE ANSWER

#4342

SESK.INFO

STRAIGHT FACE
Why did the dog resign from his job? The work was too ruff.

C It resists heat, cold, humidity and drying
WHY Parvovirus is a very tough virus. It spreads by contact with infected dogs and by contaminated feces and surfaces, and it can last in the environment for a long time.

DOGS

Leptospirosis in dogs is most often spread through what?

- A** The urine of an infected animal
- B** Dry kibble
- C** Cold, still air

FLIP FOR THE ANSWER

#4343

SESK.INFO

STRAIGHT FACE
What do you call a floating dog? A good buoy.

A The urine of an infected animal
WHY Dogs can pick up the leptospirosis bacteria from infected urine or from water, soil or bedding it has contaminated. A vaccine is available.

DOGS

What is the classic sign of kennel cough in dogs?

- A** A high-pitched whistle
- B** A frequent, honking cough
- C** Only sneezing

FLIP FOR THE ANSWER

#4347

SESK.INFO

STRAIGHT FACE
What do you call a dog with a surround sound system? A sub-woofer.

B A frequent, honking cough
WHY Kennel cough, also called canine infectious respiratory disease complex, often sounds like a honking cough. It spreads easily between dogs in close contact.

DOGS

In most cases of kennel cough, how long does it take dogs to fully recover?

- A** 1 to 2 days
- B** About a month
- C** 7 to 10 days

FLIP FOR THE ANSWER

#4345

SESK.INFO

STRAIGHT FACE
I asked my dog what's that thing on top of the house? He said, Roof Roof.

C 7 to 10 days
WHY Most cases are mild and clear up in 7 to 10 days. Puppies, older dogs and dogs with other health problems can get much sicker, so call your vet if breathing looks hard.

DOGS

Should a dog with vomiting or diarrhea go to the dog park?

- A** No, keep your dog at home if ill
- B** Yes, fresh air will help
- C** Yes, as long as it stays on a leash

FLIP FOR THE ANSWER

#4346

SESK.INFO

STRAIGHT FACE
Why aren't Dalmatians good at hide and seek? Because they are always spotted.

A No, keep your dog at home if ill
WHY Sick dogs can spread germs to other dogs through contact, toys and bowls. AVMA also says to keep vaccines current and follow the venue's rules.

DOGS

How do dogs get heartworm?

- A** From eating infected grass
- B** From a mosquito bite
- C** From another dog's sneeze

FLIP FOR THE ANSWER

#4347

SESK.INFO

STRAIGHT FACE
Why did the mosquito go to the dentist? To improve his bite!

B From a mosquito bite
WHY A mosquito that bites an infected animal picks up baby worms, then passes them to the next pet it bites. Heartworm does not spread by contact between dogs.

DOGS

How often should dogs be tested for heartworm, per the American Heartworm Society?

- A** Never, if on prevention
- B** Every 5 years
- C** Every year

FLIP FOR THE ANSWER

#4748

SESK.INFO

STRAIGHT FACE
What do you get when you cross a dog and a calculator? A friend you can count on.

WHY Annual testing makes sure the preventive is working and catches any infection early. It is usually done at a regular vet visit.

C Every year

DOGS

How many months a year should dogs get heartworm preventive?

- A** All 12 months
- B** Only the 3 summer months
- C** About 6 months

FLIP FOR THE ANSWER

#4749

SESK.INFO

STRAIGHT FACE
Our dog brings us the newspaper every day. Funny thing is, we've never subscribed to any.

WHY The American Heartworm Society advises giving heartworm preventive every month of the year. Mosquitoes can show up outside normal seasons, and even indoor dogs can be bitten.

A All 12 months

DOGS

Do indoor-only dogs need heartworm prevention?

- A** No, only outdoor dogs are at risk
- B** Yes, indoor pets are at risk too
- C** Only in winter

FLIP FOR THE ANSWER

#4350

SESK.INFO

STRAIGHT FACE
What do you call a pug that is undercover? Indognito.

WHY Infected mosquitoes can slip into homes. Indoor and outdoor dogs are both at risk, so prevention is for every dog.

B Yes, indoor pets are at risk too

DOGS

In how many US states has heartworm disease been diagnosed?

- A** Only southern states
- B** Only about 10 states
- C** All 50 states

FLIP FOR THE ANSWER

#4351

SESK.INFO

STRAIGHT FACE
Why do dogs wag their tails? Because no one else will do it for them.

WHY Heartworm is not just a southern problem. It has been found in dogs in every state, which is why testing and prevention are advised everywhere.

C All 50 states

DOGS

How long do heartworm larvae take to grow into adult worms?

- A** About 6 months
- B** 2 days
- C** About 3 years

FLIP FOR THE ANSWER

#4352

SESK.INFO

STRAIGHT FACE
What is the fastest dog in the world? A Labraghini.

WHY After an infected mosquito bite, the larvae take about six months to become adults. Adults can live for 5 to 7 years in a dog.

A About 6 months

DOGS

Where do adult heartworms live in a dog?

- A** In the stomach
- B** In the heart, lungs and blood vessels
- C** In the ears

FLIP FOR THE ANSWER

#4353

SESK.INFO

STRAIGHT FACE
What do you get if you cross a sheepdog with a rose? A collie-flower.

WHY Adult heartworms are long worms that live in the heart, lungs and the blood vessels around them. That is why the disease can hurt a dog's heart and breathing.

B In the heart, lungs and blood vessels

DOGS

How often should you check your dog for ticks?

- A** Every day, especially after time outdoors
- B** Once a year at the vet
- C** Only in winter

FLIP FOR THE ANSWER

#4354

SESK.INFO

STRAIGHT FACE
What is it called when a cat wins a dog show? A CAT-HAS-TROPHY.

WHY Ticks cling to fur and can be easy to miss. A daily check with your fingers helps you find and remove them fast.

A Every day, especially after time outdoors

DOGS

Which of these is a spot where ticks like to hide on a dog?

- A** Under the tongue
- B** Inside the mouth
- C** Between the toes

FLIP FOR THE ANSWER

#4355

SESK.INFO

STRAIGHT FACE
Why didn't the dog speak to his foot? Because it's not polite to talk back to your paw.

WHY CDC lists ears, around the tail, between the back legs, between the toes, under the front legs, under the collar and around the eyelids. Run your fingers over the fur to feel for small bumps.

C Between the toes

DOGS

What does the CDC say is important to use on your dog to protect against ticks?

- A** Human perfume
- B** A tick preventive product
- C** A fresh collar every day

FLIP FOR THE ANSWER

#4356

SESK.INFO

STRAIGHT FACE
What do you call a mad flea? A looney-tid

B A tick preventive product
WHY A vet-approved tick preventive keeps ticks from feeding. Vaccines are not available for most tickborne diseases in dogs, so prevention matters.

DOGS

What is the right way to remove a tick still attached to your dog?

- A** Grip it close to the skin with tweezers and pull steadily
- B** Smother it with petroleum jelly
- C** Burn it off with a match

FLIP FOR THE ANSWER

#4357

SESK.INFO

STRAIGHT FACE
What happened when the dog went to the flea circus? He stole the show.

A Grip it close to the skin with tweezers and pull steadily
WHY Tweezers close to the skin, with steady pressure, work best. Do not twist or crush the tick, and do not smother it with alcohol or petroleum jelly.

DOGS

How many life stages do most fleas have?

- A** Two
- B** Three
- C** Four

FLIP FOR THE ANSWER

#4358

SESK.INFO

STRAIGHT FACE
How do you start an insect race? One, two, flea, go!

C Four
WHY Fleas go through egg, larva, pupa (in a cocoon) and adult stages. Only the adults live on animals, which is why treating the home matters.

DOGS

Where does most of a flea population live?

- A** On the dog's back
- B** In the environment, not on the dog
- C** In the dog's food bowl

FLIP FOR THE ANSWER

#4359

SESK.INFO

STRAIGHT FACE
What is the most faithful insect? A flea. Once they find someone they like, they stick to them!

B In the environment, not on the dog
WHY Eggs and larvae develop in the home and yard, so only a small share of fleas are on the pet at any time. Clean bedding and carpets as part of treatment.

DOGS

Dogs can get which parasite from fleas?

- A** Tapeworms
- B** Heartworms
- C** Lungworms

FLIP FOR THE ANSWER

#49360

SESK.INFO

STRAIGHT FACE
What do you call a cheerful flea? A hop-timist!

A Tapeworms
WHY Fleas carry the tapeworm and other diseases. Heartworm comes from mosquitoes, not fleas.

DOGS

About how many eggs can a single female flea lay in one day?

- A** Up to 5
- B** Up to 20
- C** Up to 50

FLIP FOR THE ANSWER

#49361

SESK.INFO

STRAIGHT FACE
What did one flea say to the other? Should we walk or take a dog?

C Up to 50
WHY A single female flea can produce up to 50 eggs a day, so a tiny problem can explode quickly. The eggs fall off the pet into carpets and bedding.

DOGS

Is it safe to use a dog flea product on a cat?

- A** Yes, if you use half
- B** No, some dog products are toxic to cats
- C** Yes, they are all the same

FLIP FOR THE ANSWER

#49362

SESK.INFO

STRAIGHT FACE
Why did the owner get his dog a special collar? He didn't want her to flea.

B No, some dog products are toxic to cats
WHY Some dog products, especially ones with permethrin, can be deadly for cats. Only use products labeled for the right species and ask your vet.

DOGS

Many dogs are allergic to what part of a flea bite?

- A** Flea saliva
- B** Flea eggs
- C** Flea cocoons

FLIP FOR THE ANSWER

#49363

SESK.INFO

STRAIGHT FACE
How do you find where a flea has bitten you? Start from scratch!

A Flea saliva
WHY Many dogs and cats are allergic to flea saliva, which can cause intense itching. Chronic cases can lead to hair loss and thickened skin.

DOGS

What health problems can spaying a female dog help prevent or reduce?

- A** Cavities
- B** Hip dysplasia
- C** Uterine infection and breast cancer risk

FLIP FOR THE ANSWER

#49364

SESK.INFO

STRAIGHT FACE
We've begun to long for the pitter-patter of little feet, so we bought a dog. It's cheaper, and you get more feet. (Rita Rudner)

C **Uterine infection and breast cancer risk**
WHY Spaying removes the reproductive organs, which can prevent uterine infection and reduce breast cancer risk. Ask your vet about the best timing for your dog.

DOGS

Neutering a male dog can eliminate his risk of which kind of cancer?

- A** Skin cancer
- B** Testicular cancer
- C** Lung cancer

FLIP FOR THE ANSWER

#49365

SESK.INFO

STRAIGHT FACE
Why did the boy name his dog Ten Miles? So he could tell his gym teacher he walked Ten Miles every day.

B **Testicular cancer**
WHY Neutering removes the testicles, so testicular cancer cannot develop. AVMA also says sterilized pets tend to live longer on average.

DOGS

What is the single most effective thing you can do for your dog's teeth?

- A** Regularly brushing them
- B** Giving only soft food
- C** Offering ice cubes

FLIP FOR THE ANSWER

#49366

SESK.INFO

STRAIGHT FACE
One dog was a great classical music composer. Johan Sebastian Bark.

A **Regularly brushing them**
WHY Brushing removes the plaque that leads to gum disease. Daily is best, and several times a week can still help.

DOGS

By age 3, about how many dogs and cats show signs of dental disease?

- A** About 10 to 20 percent
- B** About 70 to 80 percent
- C** Almost none

FLIP FOR THE ANSWER

#49367

SESK.INFO

STRAIGHT FACE
My puppy isn't fat, he's just a little husky.

B **About 70 to 80 percent**
WHY Dental disease is very common. By age 3, most dogs and cats already have some signs, so regular checks and home care matter.

DOGS

How many adult teeth does a dog have?

- A** 28
- B** 32
- C** 42

FLIP FOR THE ANSWER

#4368

SESK.INFO

STRAIGHT FACE
What is a dog dentist's favorite tooth? The canine.

WHY Puppies get 28 baby teeth that fall out and are replaced by 42 adult teeth. The swap happens between 2 and 7 months of age.

C 42

DOGS

What is a normal body temperature for a dog?

- A** 98 to 99 F
- B** 104 to 105 F
- C** 101 to 102.5 F

FLIP FOR THE ANSWER

#4369

SESK.INFO

STRAIGHT FACE
Why was the dog such a good musician? Because he had perfect pooch.

WHY A dog's normal temperature is higher than a person's. Merck lists 101 to 102.5 F, and UC Davis lists about 100 to 102.8 F, so a reading in that range is typical.

C 101 to 102.5 F

DOGS

Bloat (GDV) in dogs is what kind of problem?

- A** A life-threatening emergency
- B** A harmless gas bubble
- C** A skin condition

FLIP FOR THE ANSWER

#4370

SESK.INFO

STRAIGHT FACE
What do dogs eat for breakfast? Pooched eggs.

WHY In bloat, the stomach swells and can twist. It cuts off blood flow and needs immediate veterinary care.

A A life-threatening emergency

DOGS

Which of these is a sign of bloat in a dog?

- A** Wagging more than usual
- B** Sleeping flat on the back
- C** Repeated dry retching

FLIP FOR THE ANSWER

#4371

SESK.INFO

STRAIGHT FACE
What is a dog's favorite food? Anything that is on your plate!

WHY Signs include restlessness, discomfort, rapid breathing, a swollen painful belly, drooling and retching without throwing up. Call a vet immediately.

C Repeated dry retching

DOGS

Bloat mainly affects what kind of dog?

- A** Tiny short-legged dogs
- B** Large, deep-chested dogs
- C** Hairless dogs

FLIP FOR THE ANSWER

#4372

SESK.INFO

STRAIGHT FACE
Which dog breed has never done anything wrong?
A Saint Bernard.

B Large, deep-chested dogs
WHY Large breeds with deep chests, like Great Danes and German Shepherds, are at higher risk. Merck calls a deep, narrow chest a proven genetic risk factor.

DOGS

At what body temperature is a dog in heatstroke territory?

- A** 105 F or higher
- B** 99 F
- C** 102 F

FLIP FOR THE ANSWER

#4373

SESK.INFO

STRAIGHT FACE
When a dog has a fever, what should you feed him?
Mustard, it's the best thing for hot dogs.

A 105 F or higher
WHY Heatstroke happens when a dog can no longer control its body temperature and it rises to 105 F or higher. Start cooling right away with cool water and get to a vet.

DOGS

ASPCA Animal Poison Control is available when?

- A** Weekdays, 9 to 5
- B** Only in summer
- C** 24 hours a day, every day

FLIP FOR THE ANSWER

#4374

SESK.INFO

STRAIGHT FACE
Why can't you tell a dog a knock-knock joke?
Because every time she hears knocking, she won't stop barking.

C 24 hours a day, every day
WHY If you think your dog swallowed something poisonous, call right away. A consultation fee may apply, but you get expert help any time.

DOGS

A dog's seizure lasting longer than how many minutes needs immediate vet care?

- A** 5 minutes
- B** 30 seconds
- C** 1 hour

FLIP FOR THE ANSWER

#4375

SESK.INFO

STRAIGHT FACE
What did the tree say to the dog? Do you like bark?
Dog: What do you think, I bark every day of my life.

A 5 minutes
WHY A seizure that goes past 5 minutes, or two or more seizures in 24 hours, means go to a vet immediately. Keep your hands away from the dog's mouth.

DOGS

At least how often should a healthy adult dog see the vet?

- A** Every 5 years
- B** Once a year
- C** Only when sick

FLIP FOR THE ANSWER

#4376

SESK.INFO

STRAIGHT FACE
How do you know your dog is a genius? You ask him what two minus two is, and he says nothing.

B Once a year
WHY Dogs often hide pain and illness, so a yearly checkup can catch problems early. A vet can also tailor the plan to your dog's age.

DOGS

Per AAHA, about how often should senior dogs see the vet?

- A** Once every 3 years
- B** Only when they seem sick
- C** Every six months

FLIP FOR THE ANSWER

#4377

SESK.INFO

STRAIGHT FACE
How can you tell if your dog is lazy? He only chases parked cars.

C Every six months
WHY AAHA says senior pets should be examined every six months. Older dogs can change quickly, and early checks can catch problems sooner.

DOGS

Per AAHA, a dog becomes a senior when it enters which part of its estimated lifespan?

- A** The last 25%
- B** The first 25%
- C** The middle 50%

FLIP FOR THE ANSWER

#4378

SESK.INFO

STRAIGHT FACE
Why is my dog's back always sore? He's a mastiff.

A The last 25%
WHY A senior stage depends on breed and size because bigger dogs tend to age faster. AAHA defines it as the last quarter of the expected lifespan.

DOGS

Which of these can be a sign of dementia in a senior dog?

- A** Growing a shorter tail
- B** Changes in sleep patterns
- C** Suddenly loving baths

FLIP FOR THE ANSWER

#4379

SESK.INFO

STRAIGHT FACE
A man was amazed to see his friend playing chess with his dog. That's the smartest dog I've ever seen! The friend said, Nah, I've beaten him three games out of five.

B Changes in sleep patterns
WHY Older dogs can get senility, also called cognitive dysfunction. Signs include changes in sleep patterns, loss of housetraining, getting lost in familiar places and less interest in people.

DOGS

Which kind of chocolate is generally the most dangerous for a dog?

- A** Dark chocolate
- B** White chocolate
- C** Milk chocolate

FLIP FOR THE ANSWER

#4380

SESK.INFO

STRAIGHT FACE
What did the hungry dalmatian say after his meal?
That hit the spots.

A Dark chocolate
WHY The more cacao in the chocolate, the more of the toxic ingredient it holds. Keep all chocolate out of reach.

DOGS

Chocolate, coffee and caffeine are risky for dogs because they all contain what?

- A** Tartaric acid
- B** Methylxanthines
- C** Allium compounds

FLIP FOR THE ANSWER

#4381

SESK.INFO

STRAIGHT FACE
How does a dog feel after a long workout?
Doggone tired.

B Methylxanthines
WHY Methylxanthines are stimulant chemicals. Chocolate, coffee and caffeine all carry them.
