

The SESK Tabletop Game

SESK KIDS

How to play (30 seconds)

1. The reader reads a card and its three answers out loud.
2. Everyone says "One, two, three, Goldilocks!" and holds up 1, 2, or 3 fingers.
3. The reader flips the card and reads the answer and the Why.
4. Everyone who was right takes a point.
5. The reader reads the joke with a straight face. Anyone laughs or groans? The reader takes a point. Nobody got it right? The reader takes a point.
6. Pass the deck left. Most points when the points run out wins.

What you need

These cards and the point tokens on the last two pages. No tokens? Use coins, buttons, pebbles, or marshmallows. 3 to 10 players, ages 8 and up.

Expert rule: Bet It

Before the reader flips the card, you may put one of your points on your answer. Right: take your normal point plus one extra. Wrong: your bet goes back to the pile. That's it.

Printing

Print single-sided, on cardstock if you have it. Cut on the dashed lines. Each card is a 3.5 x 5 inch index card. The answer half is upside down on purpose, so the table can't peek.

Cards 1 to 50 of 58. More cards and the free daily online game at sesk.info. Built 2026-10-08.

KIDS SKILLS

How long should you wash your hands?

- A** 20 seconds, about two Happy Birthdays
- B** 3 seconds under the water
- C** 2 full minutes

FLIP FOR THE ANSWER

#006

SESK.INFO

STRAIGHT FACE
I dropped the soap and it shot right down the drain. Guess it made a clean getaway.

A 20 seconds, about two Happy Birthdays
WHY The CDC says scrub with soap for 20 seconds, about humming Happy Birthday twice. Warm or cold water both work. Get the backs, between fingers and under nails.

KIDS SKILLS

How much Halloween candy should you eat?

- A** None at all
- B** A couple of pieces after dinner, then brush
- C** As much as you want on Halloween night

FLIP FOR THE ANSWER

#007

SESK.INFO

STRAIGHT FACE
Why didn't the skeleton eat all his Halloween candy? He didn't have the stomach for it.

B A couple of pieces after dinner, then brush
WHY Right after a meal your mouth makes extra spit that helps wash sugar away. Have a couple of pieces, then brush. Plain chocolate is easiest on teeth.

OUTDOORS & CAMPING

You're lost on a hiking trail. What do you do?

- A** Head downhill, because streams lead to roads
- B** Stay put, hug a tree, and blow three whistle blasts
- C** Climb to high ground to get a look around

FLIP FOR THE ANSWER

#017

SESK.INFO

STRAIGHT FACE
How do trees get on the internet? They log in.

B Stay put, hug a tree, and blow three whistle blasts
WHY Searchers start along your planned route, so staying put makes you easier to find. Hugging a tree keeps you calm and in one place. Three blasts means "I need help," and a whistle carries farther than your voice.

OUTDOORS & CAMPING

A thunderstorm chases you away from the campfire. When is it safe to go back out?

- A** 30 minutes after the last thunder
- B** As soon as the rain stops
- C** When you can see blue sky again

FLIP FOR THE ANSWER

#018

SESK.INFO

STRAIGHT FACE
What does a cloud wear under its raincoat? Thunderwear.

A 30 minutes after the last thunder
WHY Lightning can strike up to 10 miles from a storm, even after the rain stops. Wait 30 minutes after the last thunder. Tents and picnic shelters don't protect you; a building or a hard-topped car does.

OUTDOORS & CAMPING

You find a tick stuck in your skin after a hike. What's the best way to get it out?

- A** Grab it close to the skin with fine tweezers and pull straight out, slow and steady
- B** Touch it with a just-blown-out match so it backs out on its own
- C** Cover it with nail polish or petroleum jelly so it lets go

FLIP FOR THE ANSWER

#019

SESK.INFO

STRAIGHT FACE
Did you hear about the new app where ticks do funny dances? It's called Tick-Talk!

A Grab it close to the skin with fine tweezers and pull straight out, slow and steady
WHY Heat, nail polish, and jelly can make the tick upset, and it may push germs into your skin. Use tweezers right at the skin and pull with steady pressure, no twisting or jerking. Then wash the bite and your hands with soap and water, and check for more ticks.

OUTDOORS & CAMPING

Time to leave camp. What's the right way to put out the campfire?

- A** Bury it under a good thick layer of dirt or sand
- B** Let it burn down until there are no more flames
- C** Drown it with water, stir the ashes, then drown it again

FLIP FOR THE ANSWER

#020

SESK.INFO

STRAIGHT FACE
What does a campfire say after a long day of work? I'm burned out!

C Drown it with water, stir the ashes, then drown it again
WHY Dirt or sand alone is not enough to put a fire out. Pour water until the hissing stops, stir the ashes with a shovel, and add more water. Hold your hand over the ashes: if it's too hot to touch, it's too hot to leave.

OUTDOORS & CAMPING

Your only water at camp comes from a creek. How long should you boil it before drinking?

- A** Just until the first small bubbles show up
- B** At a rolling boil for 1 minute
- C** At a rolling boil for a full 10 minutes

FLIP FOR THE ANSWER

#021

SESK.INFO

STRAIGHT FACE
Why did the boiling water disappear? I don't know. It's a mist-ery.

B At a rolling boil for 1 minute
WHY Once the water is at a big, rolling boil, 1 minute is enough to kill the germs that make you sick. High in the mountains, above 6,500 feet, boil it for 3 minutes. Let it cool before you drink it.

OUTDOORS & CAMPING

You're at the lake all day. How often should you put on more sunscreen?

- A** About every 2 hours, and again after swimming or sweating
- B** Once in the morning is enough if it's SPF 50 or higher
- C** When your skin starts looking a little pink

FLIP FOR THE ANSWER

#022

SESK.INFO

STRAIGHT FACE
Why do bananas wear sunscreen at the beach? They peel easily.

A About every 2 hours, and again after swimming or sweating
WHY Sunscreen wears off as you swim, sweat, and towel off, even the strong stuff. Put more on about every 2 hours, and right after you get out of the water. A grown-up needs about enough to fill a shot glass to cover the whole body.

OUTDOORS & CAMPING

A friend's fingers are numb, pale, and frostbitten. How should you warm them up?

- A** Rub them with snow so they warm up slowly
- B** Hold them close to the campfire or a heater
- C** Soak them in warm, not hot, water and don't rub them

FLIP FOR THE ANSWER

#023

SESK.INFO

STRAIGHT FACE
What do you get if you cross a snowman and a shark?
Frostbite.

C Soak them in warm, not hot, water and don't rub them
WHY Rubbing, even with snow, hurts frozen skin more. Numb fingers can't feel heat, so a fire or heater can burn them without anyone noticing. Soak them in warm water for about 30 minutes, and get help from a doctor.

SAFETY & FIRST AID

How often should you clean the lint filter in your clothes dryer?

- A** Once a month
- B** When it looks full
- C** Every load

FLIP FOR THE ANSWER

#024

SESK.INFO

STRAIGHT FACE
I saw my husband trip and fall while carrying a laundry basket full of ironed clothes. I watched it all unfold.

C Every load
WHY A dirty lint filter raises the chance of a dryer fire. The U.S. Fire Administration says to clean it before and after every load. The vent that carries the hot air outside needs cleaning too.

SAFETY & FIRST AID

A pan of grease catches fire on the stove. What should you do?

- A** Throw a cup of water on it
- B** Cover it with a lid and turn off the burner
- C** Carry the pan to the sink

FLIP FOR THE ANSWER

#025

SESK.INFO

STRAIGHT FACE
What's on every fire department menu? Five Alarm
Chili.

B Cover it with a lid and turn off the burner
WHY Water makes burning grease splash and spreads the fire. A lid cuts off the fire's air, and turning off the burner stops the heat. Baking soda also works on a small grease fire.

SAFETY & FIRST AID

Your carbon monoxide alarm starts beeping. What should you do first?

- A** Get everyone outside, then call 911
- B** Open the windows and look for what's causing it
- C** Press the button to quiet it and see if it goes off again

FLIP FOR THE ANSWER

#026

SESK.INFO

STRAIGHT FACE
I tried to write a chemistry joke, but could never get a reaction.

A Get everyone outside, then call 911
WHY Carbon monoxide has no smell or color, so you can't find it or tell how much is in the air. Get to fresh air first, then call 911 from outside. Every level of your home and the area outside bedrooms should have a CO alarm.

SAFETY & FIRST AID

Why shouldn't you run an extension cord under a rug?

- A** Someone could trip over the bump
- B** The cord can't cool off and could start a fire
- C** Stepping on it wears a line in the rug

FLIP FOR THE ANSWER

#027

SESK.INFO

STRAIGHT FACE
Where do lightbulbs go shopping? The outlet mall.

B The cord can't cool off and could start a fire
WHY A covered cord traps its own heat, and that heat can start a fire. Extension cords are meant for short-term use, not as permanent wiring. If you need one all the time, it's time to add more outlets.

SAFETY & FIRST AID

What temperature should most home water heaters be set to?

- A** 120°F
- B** 140°F
- C** 100°F

FLIP FOR THE ANSWER

#028

SESK.INFO

STRAIGHT FACE
RIP boiled water. You will be mist.

A 120°F
WHY Water at 140°F can cause a bad burn in about six seconds, but at 120°F it takes about five minutes. Some water heaters come set to 140°F from the factory. Turning it down to 120°F also slows mineral buildup in the tank and pipes.

KITCHEN & FOOD

Where is the best place to keep eggs in the fridge?

- A** In the egg tray on the door
- B** Out of the carton in a bowl
- C** In their carton on an inside shelf

FLIP FOR THE ANSWER

#032

SESK.INFO

STRAIGHT FACE
Why shouldn't you tell an egg a joke? Because it might crack up.

C In their carton on an inside shelf
WHY The door is the warmest spot in the fridge and warms up every time it opens. Keep eggs in their carton in the coldest part of the fridge, and raw eggs in the shell will keep 3 to 5 weeks.

MONEY

What is U.S. paper money mostly made of?

- A** Cotton and linen
- B** Paper made from wood pulp
- C** Thin plastic

FLIP FOR THE ANSWER

#037

SESK.INFO

STRAIGHT FACE
If money doesn't grow on trees, then why do banks have branches?

A Cotton and linen
WHY U.S. bills are about three-fourths cotton and one-fourth linen, the same kinds of fibers used in clothes, not wood paper like a notebook. Tiny red and blue threads are mixed in to help stop counterfeiters.

HOW THINGS WORK

Why is it hotter in the summer and colder in the winter?

- A** The Earth gets closer to the sun
- B** The sun burns hotter in summer
- C** The Earth is tilted on its axis

FLIP FOR THE ANSWER

#050

SESK.INFO

STRAIGHT FACE
What happens when winter arrives? Things go downhill fast.

C **WHY** The Earth is tilted on its axis because the planet leans to one side. When your half tilts toward the sun, you get summer.

HOW THINGS WORK

Does water flush down the toilet in the opposite direction in Australia?

- A** Yes, because of the equator
- B** No, it depends on the water jets
- C** Yes, the Earth's spin pulls it

FLIP FOR THE ANSWER

#051

SESK.INFO

STRAIGHT FACE
Why did the toilet paper roll down the hill? To get to the bottom.

B **WHY** No, it depends on the water jets which spins giant hurricanes. But a toilet bowl is far too small for that force to matter.

HOW THINGS WORK

Is the glass in old windows thicker at the bottom because glass slowly flows down?

- A** Yes, glass is a slow liquid
- B** No, the window frames squeeze it
- C** No, glass is a solid

FLIP FOR THE ANSWER

#052

SESK.INFO

STRAIGHT FACE
Why did the window go to the doctor? It was in a lot of pain.

C **WHY** No, glass is a solid. Hundreds of years ago, glassblowers spun glass into flat discs that were thicker at the edges. Builders usually put the thicker edge at the bottom for stability.

HOW THINGS WORK

Is there zero gravity in space where the space station orbits?

- A** Yes, there is no gravity in space
- B** No, they are just falling constantly
- C** Yes, because there is no air

FLIP FOR THE ANSWER

#053

SESK.INFO

STRAIGHT FACE
Why did the cow go to outer space? To visit the Milky Way.

B **WHY** No, they are just falling constantly. Gravity up there is almost as strong as on Earth. But the station is moving sideways so fast that as it falls, the Earth curves away beneath it.

HOW THINGS WORK

What happens if you leave a penny on a railroad track and a train hits it?

- A** The penny gets flattened
- B** The train derails
- C** The penny shoots out like a bullet

FLIP FOR THE ANSWER

#054

SESK.INFO

STRAIGHT FACE
What do you call a train that eats a lot? A chew train.

A **The penny gets flattened**
WHY A train weighs thousands of tons and a penny weighs practically nothing. The massive steel wheels just crush the soft copper and zinc flat.

HOW THINGS WORK

Can you catch a cold just from going outside with wet hair in winter?

- A** Yes, the cold weakens you instantly
- B** No, you need to catch a virus
- C** Yes, cold air freezes your lungs

FLIP FOR THE ANSWER

#055

SESK.INFO

STRAIGHT FACE
What do you catch but never throw? A cold.

B **No, you need to catch a virus**
WHY You can only catch a cold if you come into contact with a cold virus. Being chilly might make you shiver, but it cannot create a germ.

HOME & YARD

What time of day is best to water your lawn during the summer?

- A** Early morning
- B** High noon
- C** Late at night

FLIP FOR THE ANSWER

#056

SESK.INFO

STRAIGHT FACE
What did the grass say to the water? I am rooting for you.

A **Early morning**
WHY If you water at noon, the hot sun evaporates the water before the roots get it. If you water at night, the wet grass can grow fungus.

HOME & YARD

What kind of plunger are you supposed to use to unclog a toilet?

- A** A flat red cup plunger
- B** A flange plunger with a flap
- C** Any plunger works the same

FLIP FOR THE ANSWER

#057

SESK.INFO

STRAIGHT FACE
Why did the plumber fall asleep? His job was too draining.

B **A flange plunger with a flap**
WHY A flat cup plunger is only meant for flat sinks and tubs. The extra flap on a flange plunger fits perfectly into the toilet drain to create a seal.

HOME & YARD

Should you run hot or cold water down the drain while using the garbage disposal?

- A** Cold water to keep grease solid
- B** Hot water to melt grease
- C** It does not matter at all

FLIP FOR THE ANSWER

#060

SESK.INFO

STRAIGHT FACE
Why did the garbage disposal complain? It had a lot on its plate.

A **Cold water to keep grease solid**
WHY If you use hot water, it melts the fat, which then slips past the disposal and clogs your pipes further down as it cools. Cold water keeps it hard so the disposal can grind it.

HOME & YARD

How short should you cut your grass when you mow the lawn?

- A** As short as the mower goes
- B** Exactly one inch tall
- C** Never more than one third off

FLIP FOR THE ANSWER

#061

SESK.INFO

STRAIGHT FACE
Why did the lawn mower go to therapy? It had deep seeded issues.

C **Never more than one third off**
WHY Cutting grass too short removes the leaves it uses for solar power. Scalping the lawn makes the grass weak and allows weeds to take over.

TECH & GADGETS

What is the best thing to do if you drop your phone in water?

- A** Put it in a bowl of dry rice
- B** Dry it with a hot hair dryer
- C** Turn it off and use a fan

FLIP FOR THE ANSWER

#063

SESK.INFO

STRAIGHT FACE
What do you call a phone that takes baths? A liquid crystal display.

C **Turn it off and use a fan**
WHY Rice is too slow at absorbing moisture and the dust can ruin your charging port. A fan speeds up evaporation safely.

HEALTH BASICS

When should you turn off screens before bed?

- A** At least 30 minutes before
- B** Right when you feel sleepy
- C** Only if you can't fall asleep

FLIP FOR THE ANSWER

#070

SESK.INFO

STRAIGHT FACE
Why was the phone bad at sleeping? It kept getting notifications.

A **At least 30 minutes before**
WHY CDC lists turning off electronic devices at least 30 minutes before bed as a habit that helps sleep. A fixed bedtime helps too.

HEALTH BASICS

Does SPF 30 mean you can stay in the sun 30 times longer?

- A** Yes, 30 times longer
- B** Yes, if you put it on before going out
- C** No, it is not a timer

FLIP FOR THE ANSWER

#071

SESK.INFO

STRAIGHT FACE
Why did the tomato turn red? It saw the salad dressing.

C No, it is not a timer
WHY FDA says SPF is about how much sun it takes to burn, not clock time. Midday sun is stronger, so the same SPF does not buy a set number of hours.

HEALTH BASICS

Is any sunscreen really waterproof?

- A** Yes, if the bottle says waterproof
- B** No, it eventually washes off
- C** Yes, if it says sport or water resistant

FLIP FOR THE ANSWER

#072

SESK.INFO

STRAIGHT FACE
What did the ocean say to the shore? Nothing, it just waved.

B No, it eventually washes off
WHY FDA says there is no waterproof sunscreen. Water-resistant ones must say if they last 40 or 80 minutes while you swim or sweat.

HEALTH BASICS

If there is no soap, what hand sanitizer should you use?

- A** Any scented bottle
- B** At least 60% alcohol
- C** Any kind, the alcohol amount doesn't matter

FLIP FOR THE ANSWER

#073

SESK.INFO

STRAIGHT FACE
Why did the germ cross the playground? To get to the other side.

B At least 60% alcohol
WHY CDC says soap and water is best. If you cannot wash, use sanitizer with at least 60% alcohol and rub until your hands are dry.

KIDS SKILLS

How much sleep does a school-age kid need?

- A** 7 hours, same as grown-ups
- B** 9 to 12 hours
- C** 14 hours, naps included

FLIP FOR THE ANSWER

#074

SESK.INFO

STRAIGHT FACE
What did the pencil say to the paper? Write on!

B 9 to 12 hours
WHY CDC says kids 6 to 12 need 9 to 12 hours. Enough sleep helps attention, mood, and memory at school.

KIDS SKILLS

If your clothes catch fire, what do you do?

- A** Stop, drop, and roll
- B** Run to blow it out
- C** Pat the flames with your hands

FLIP FOR THE ANSWER

#075

SESK.INFO

STRAIGHT FACE
What is a firefighter's favorite card game? Go fish, after the fire is out.

A **Stop, drop, and roll**
WHY US Fire Administration says stop, drop, cover your face with your hands, and roll until the fire is out. Running feeds the flames.

KIDS SKILLS

After you put on hand sanitizer, what next?

- A** Wipe it off right away
- B** Rub until your hands are dry
- C** Rinse it with water

FLIP FOR THE ANSWER

#076

SESK.INFO

STRAIGHT FACE
Why did the clock get in trouble? It ticked too much.

B **Rub until your hands are dry**
WHY CDC says cover all surfaces and rub until dry, about 20 seconds. Wiping or rinsing early can keep it from working well.

KIDS SKILLS

When do you put sunscreen on before going outside?

- A** After you feel hot
- B** About 15 minutes before
- C** Only if you already burned

FLIP FOR THE ANSWER

#077

SESK.INFO

STRAIGHT FACE
Why did the kid bring a ladder to the beach? To reach the high tide.

B **About 15 minutes before**
WHY FDA says apply 15 minutes before sun exposure so the sunscreen has time to work. Waiting until you are pink is too late.

KIDS SKILLS

How often should you replace a toothbrush?

- A** Every 3 to 4 months
- B** Once a year
- C** Only when you lose it

FLIP FOR THE ANSWER

#078

SESK.INFO

STRAIGHT FACE
What did the tooth say to the toothbrush? You brush me off so easily.

A **Every 3 to 4 months**
WHY The American Dental Association says replace a toothbrush every 3 to 4 months, or sooner if bristles look matted. Soft bristles and a gentle hand are kinder to gums.

HEALTH BASICS

What temperature is generally considered a fever?

- A 99°F
- B 100.4°F
- C 102°F

FLIP FOR THE ANSWER

#094

SESK.INFO

STRAIGHT FACE
Why did the thermometer get promoted? It had degrees.

B 100.4°F
WHY Many health organizations use 100.4°F as the standard fever threshold.

HEALTH BASICS

At what UV Index should you start protecting your skin?

- A 3 or higher
- B Only at 8+
- C Only in summer

FLIP FOR THE ANSWER

#097

SESK.INFO

STRAIGHT FACE
What does the sun eat for breakfast? Light toast

A 3 or higher
WHY UV rays can damage skin even on cool or cloudy days.

KIDS SKILLS

Where should the front of a bike helmet sit?

- A On top of head
- B Covering eyebrows
- C 1 to 2 fingers above eyebrows

FLIP FOR THE ANSWER

#098

SESK.INFO

STRAIGHT FACE
Why can't a bicycle stand alone? It's two-tired.

C 1 to 2 fingers above eyebrows
WHY A helmet sitting too high leaves the forehead exposed.

KIDS SKILLS

Most kids need a booster seat until about what height?

- A 4 feet
- B 4 feet 9 inches
- C 5 feet 3 inches

FLIP FOR THE ANSWER

#099

SESK.INFO

STRAIGHT FACE
Why did the seat belt break up with the chair? No support

B 4 feet 9 inches
WHY Most seat belts do not fit correctly until kids reach about this height.

KIDS SKILLS

Before crossing a street, what should you do?

- A** Wait for a driver to wave you across
- B** Look once
- C** Look left, right, left

FLIP FOR THE ANSWER

#102

SESK.INFO

STRAIGHT FACE
Why did the chicken cross the road? To get to the other side.

C Look left, right, left
WHY Checking both directions helps you notice traffic before stepping out.

CARS & DRIVING

What does the small arrow by the fuel gauge show?

- A** Fuel type
- B** Fuel door side
- C** Tank size

FLIP FOR THE ANSWER

#105

SESK.INFO

STRAIGHT FACE
Why did the car bring a map? It liked directions.

B Fuel door side
WHY The arrow points to the side of the car with the fuel door.

CARS & DRIVING

When should headlights be on during rain?

- A** Only at night
- B** Only in heavy storms
- C** Whenever visibility drops

FLIP FOR THE ANSWER

#106

SESK.INFO

STRAIGHT FACE
The headlight had a bright future.

C Whenever visibility drops
WHY Headlights help you see and help others see you.

KITCHEN & FOOD

What should you use to wash an apple before eating it?

- A** Plain running water
- B** A little dish soap
- C** A special produce wash

FLIP FOR THE ANSWER

#110

SESK.INFO

STRAIGHT FACE
What do you call a sad strawberry? A blueberry.

A Plain running water
WHY Rub the apple gently under running water. Soap and special produce washes are unnecessary.

KITCHEN & FOOD

What is the highest recommended temperature for your refrigerator?

- A** 45°F
- B** 40°F
- C** 50°F

FLIP FOR THE ANSWER

#111

SESK.INFO

STRAIGHT FACE
What do you call a cold dog? A chili dog.

B 40°F
WHY Keep the fridge at 40°F or below. An appliance thermometer checks the actual temperature.

KITCHEN & FOOD

Where should raw meat sit while it marinates?

- A** On the kitchen counter
- B** Beside the warm grill
- C** In the refrigerator

FLIP FOR THE ANSWER

#112

SESK.INFO

STRAIGHT FACE
What do you call a cow with two legs? Lean beef.

C In the refrigerator
WHY Keep marinating meat in the fridge. Bacteria can multiply quickly at room temperature.

KITCHEN & FOOD

How long can properly handled cooked meat leftovers stay in a fridge at 40°F or below?

- A** About a week
- B** 3 to 4 days
- C** Until they smell different

FLIP FOR THE ANSWER

#114

SESK.INFO

STRAIGHT FACE
Why did the cookie go to the hospital? It felt crummy.

B 3 to 4 days
WHY Eat refrigerated cooked meat leftovers within 3 to 4 days. Freeze them if you need longer storage.

KITCHEN & FOOD

Is homemade cookie dough safe to eat raw if you leave out the eggs?

- A** No, raw flour can carry germs
- B** Yes, eggs are the only concern
- C** Yes, if the dough is chilled

FLIP FOR THE ANSWER

#116

SESK.INFO

STRAIGHT FACE
Why did the baker stop making doughnuts? He was tired of the hole business.

A No, raw flour can carry germs
WHY Raw flour can contain harmful germs too. Bake homemade dough before eating it.

SECURITY & PRIVACY

Does a familiar caller ID prove who is calling?

- A** Yes, if the number is local
- B** Yes, if your bank's name appears
- C** No, the displayed name can be faked

FLIP FOR THE ANSWER

#118

SESK.INFO

STRAIGHT FACE
Why did the telephone wear glasses? It lost its contacts.

C **No, the displayed name can be faked**
WHY Scammers can fake the displayed name or number. Caller ID alone does not verify a caller.

SECURITY & PRIVACY

Why install phone software updates even when you do not want new features?

- A** They can fix security weaknesses
- B** They only change the appearance
- C** They mostly slow older phones down

FLIP FOR THE ANSWER

#122

SESK.INFO

STRAIGHT FACE
What do you call an alligator in a vest? An investigator.

A **They can fix security weaknesses**
WHY Updates can protect against security threats. Turn on automatic updates so fixes arrive promptly.
